Serial No.: 09/912,601

means for generating a mechanical stress differential at the outside surface of the shell during ammunition initiation, wherein said differential enhances splinter generation and is spatially distributed across the shell.

- 3. (Twice Amended) The explosive ammunition according to claim 1, wherein the means for generating a stress differential comprises a netting solidly joined to the case or placed between the case and the shell, said netting constituting the weakening array.
- 4. (Twice Amended) The explosive ammunition according to glaim 1, wherein the case is made of plastic.
- 5. (Twice Amended) The explosive ammunition according to claim 3, wherein the netting is imbedded in the case.
- 6. (Twice Amended) The explosive ammunition according to claim 1, wherein the array is fitted with square elementary meshes.

Serial No.: 09/912,601

claim

- 7. (Twice Amended) The explosive ammunition according to claim 1, wherein the shell is made of steel or tungsten.
- 8. (Twice Amended) The explosive ammunition according to claim 1, wherein the case constitutes a nose cone.
